

## Product Description

# RCX 132603 Flame Retardant Masterbatch Halogenated

### INTRODUCTION

---

RCX 132603 is a flame retardant masterbatch containing a synergistic system of 70% flame retardant additives based on a proprietary carrier for extrusion or injection molding applications. RCX 132603 is ideal for use in Polypropylene applications.

### BENEFITS

---

- RCX 132603 is provided in masterbatch form to facilitate handling and processing.
- Supplied in pellet form.
- Utilizes a high-flow carrier system for improved incorporation.
- Cost effective flame retardant solution.

### RECOMMENDED USAGE

---

Typical use levels will range from 20% to 40% depending on application, part thickness, and desired flame retardant performance.

The optimum additive loading in the final part depends on the specific processing conditions and environment the part is to be used in. The processor will need to confirm the optimum loading level for each particular end use.

### STORAGE AND HANDLING

---

RCX 132603 should be stored in closed containers in a cool, dry environment.

02 DEC 2013

This information is intended to be used only as a guideline for designers and processors of modified thermoplastics for injection molding. Because injection mold design and processing is complex, a set solution will not solve all problems. Observation on a "trial and error" basis may be required to achieve desired results.

Data are obtained from specimens molded under carefully controlled conditions from representative samples of the compound described herein. Properties may be materially affected by molding techniques applied and by the size and shape of the item molded. No assurance can be implied that all molded articles will have the same properties as those listed.

No information supplied by RTP Company constitutes a warranty regarding product performance or use. Any information regarding performance or use is only offered as suggestion for investigation for use, based upon RTP Company or other customer experience. RTP Company makes no warranties, expressed or implied, concerning the suitability or fitness of any of its products for any particular purpose. It is the responsibility of the customer to determine that the product is safe, lawful and technically suitable for the intended use. The disclosure of information herein is not a license to operate under, or a recommendation to infringe any patents.
